

SERVICE PROFILE

Perimeter Church

Electrosonic, a solid choice you can believe in for lamp replacement

Electrosonic's Service Solutions team provides expert projector lamp replacement services for Perimeter Church. Located in Johns Creek, Georgia, Perimeter Church relies on Electrosonic to replace the Xenon and UHP lamps for over thirty projectors located across its campus.

"I have tried many vendors and all of them have had their issues; anywhere from no availability, poor support, slow shipping, to canceled orders. Electrosonic claimed to be able to supply our projector lamps. I was skeptical, but their response time and communication were the best ever. They were also able to get all of

the lamps I needed. Electrosonic is now my one stop for projector lamps," said Ashley Lane, Chief Engineer/ Production Technician of Perimeter Church's Tech Department.

Electrosonic's Service Solutions provides Perimeter Church with the following services:

Projector Lamp Replacement Program

- Guaranteed availability of replacement lamps
- Extended lamp warranty
- Lamp inventory management
- 100% spent lamp recycling
